MRS. POWERS DISCHARGED BY HOSPITAL

Washington, April 25 (AP)—Mrs. Barbara Powers, 27, wife of U-2 Pilot Francis Gary Powers, was discharged Monday from Georgetown university hospital, a spokesman said today.

The nature of her illness was still something of a mystery. Powers was not immediately available for comment on a New York newspaper story today that quoted him as saying his wife had indigestion and that a report she had taken on overdose of sleeping pills was silly.

When Mrs. Powers was admitted to the hospital in a coma last Friday police said she was reported to have taken an overdose of a sleep-inducing barbiturate. A hospital statement was that she was being studied to determine the cause of her illness, "which is probably due to a medication reaction."
